SUPER LIPO-LEAN INJECTION FOR WEIGHT LOSS

Super Lipo-Lean Injection (also known as Lipo-B12 or Lipotropic) is an injection of vitamins, minerals and amino acids that are essential for your health, especially the health of your liver. Your liver is responsible for removing fat and toxins from your body, so the healthier it is, the better it will work for you. Lipo-B injections deliver nutrients to the body essential in keeping your energy at its best. Many of these nutrients can not be absorbed by mouth and need to be taken by injection. Injections are a safe, effective way to keep your body well-balanced. Vitamin B12 Lipotropic Injections help increase your energy as well as contribute success of your weight loss plan.

The injections include the following naturally occurring vitamins, amino acids and minerals.

Methionine – An antioxidant amino acid that neutralizes free radicals. It aids in breaking down fat, removing heavy metals from the body, and helps with digestion. It is one of the

important amino acids that increase energy and lean muscle mass. Studies also show it is able to strengthen the hair and nails.

Inositol – A vitamin that is vital for the metabolism of fat and cholesterol. It prevents hardening of the arteries; it has also been shown to help in the treatment of depression and anxiety.

Choline – Plays a major role in cardiovascular health, in addition to minimizing excess fat in the liver through its fat and cholesterol metabolic properties. It also aids in hormone production. Athletes use it for bodybuilding and delaying fatigue in endurance sports.

Vitamin B12 – Regulates the formation of red blood cells and helps in the utilization of iron, preventing anemia. It is an important component of the body system because it is required for proper digestion, absorption and synthesis of foods, protein synthesis, and the metabolism of carbohydrates and fats. Vitamin B12 is also necessary for a healthy nervous system.

Vitamin B1—Is the key player in the production of energy from dietary carbs and fats.

Vitamin B2—Boosts immune system; slows aging process; and helps with the delivery of B6. It also helps with migraine headaches.

Vitamin B6—Because it makes hormones serotonin and norepinephrine which regulates moods, it is needed in weight loss process “moodiness”.

Great results have been reported from adding Lipo-B12 shots to your weight loss plan.

Levocarnitine—Is an amino acid derivative and is needed to maintain a healthy metabolism

Chromium Picolinate—mineral that helps process carbs and fats; studies show it being beneficial to diabetics because it regulates insulin spikes.

Q and A

How much weight will I lose when receiving the B12 Lipotropic injections?

The vitamin B12 Lipotropic injections are a tool to aid your dieting efforts. The injections alone will not cause weight loss. It is with a healthy diet and exercise program that you will see and feel the benefits of the injection.

How often is it recommended to get the shot?

For on-site clinics, KMM will administer twice a month at the most. If an individual has extreme weight issues, contact KMM to be scheduled with a physician for an exam to justify more dosages.

Who shouldn't take a Lipo-B12 shot?

Pregnant or a woman that thinks she may be pregnant should not take a Lipo-B12.

Does shot interfere with any other medication?

No.
